

ROYAL STATISTICAL SOCIETY

EDINBURGH LOCAL GROUP MEETING

Tuesday 13 November 2007 (6.00 – 7.00 pm)
Non-members welcome

Refreshments available from 5.30 pm

Data Warehousing: Examples from the Scottish Criminal Justice System and the National Health Service in Scotland

Sandy Taylor (Statistician, Scottish Government, Justice Analytical Services Divisions (ASD)) and **Jill Telfer** (Head of Programme, Scottish Health Information Service, Information Services Division (ISD))

Abstract This talk will be in two parts, exploring recent developments in data warehousing in Scotland.

Criminal Justice: A pilot project was carried out by the Justice ASD, together with criminal justice agencies, to establish the feasibility of tapping into case management data on criminal justice case trajectories. A flexible front-end tool has been developed to allow users access to generate their own profiles of interest, e.g. by type of offender.

NHS Scotland: One of the key recommendations from the 2005 "Health and Care Statistics Review" was that ISD should establish a corporate data warehouse to enable inquirers to run through their own queries using data gathered from the NHS. This talk will provide an update on the progress and present an example of one of the new online toolsets, Navigator.

Venue: International Centre for Mathematical Sciences, 14 India Street, Edinburgh EH3 6EZ

Treasurer and secretary: Margaret MacDougall

E-mail: Margaret.MacDougall@ed.ac.uk
